

**No1 Living 40'**

***Standard equipment specifications***

**No1**  
**LIVING**

***No1 Living is supplied with plenty of high quality equipment, which allows his purchaser to move in immediately. No1 Living is able to inhabit 12 guests with comfortable and pleasant feeling on board.***

### **1. Design**

The basis of No1 Living is composed from steel construction with anticorrosion protection without any maintenance requirements and with high-strength, resistance and very long durability. Great floatation is ensured by polyethylene segmented floats from German supplier, which are resistant to UV radiation and frost with inner tanks (470l for waste and 470l for clean water).

### **2. Residential extension 30 m<sup>2</sup>**

Walls, ceiling and floor of the body creates lightened thermally insulating material with thermal resistance  $R = 1.25$ . No1 Living is modeled and manufactured to fulfill high requirements for design and long durability. Walls surface from both sides is made from aluminum plate, ceiling and floor has besides the isolating layer also laminate and waterproof plywood. For doors and windows are used high quality aluminum frames in anthracite color with emphasis on interrupted thermal bridge. Glazing in frames is made from hardened isolating security double glass ( $U_g = 1,1$ ).

### **3. Kitchen**

High quality kitchen unit in white color is equipped with a durable, non-porous worktop from Corian material, stainless steel sink with chrome faucet Hansgrohe, built-in two-plate induction cooker 230 V, refrigerator with inside freezer and capacity 130 l and two sockets 230 V. Built-in LED lighting 12 V, door hinges and drawer hinges in kitchen with a soft roll are obvious.

### **4. Main living room**

The basis of the living area is a wall unit in white with sliding doors and storage space. It is supplemented by gray carpet with a high hair and softly upholstered ceiling in white synthetic leather, by which are upholstered the pillars of the structure. Elegant design is decorated by dual LED ceiling lights and two additional LED spotlights. For usage of other appliances are added 2 sockets 230 V. Front glass wall with glazed both sides gives a sense of harmony with nature together with panoramic views of the water, which can be enjoyed equally well in cold weather as in summer when the sliding doors into front terrace are widely open.

## **5. Bedroom**

The dominant design and practical element in the bedroom is built-in wardrobe in white with plenty of storage space. Cozy interior complements a high hair carpet in gray and softly upholstered ceiling in white synthetic leather, by which are upholstered the pillars of the structure. Lighting is provided by ceiling linear LED lights that interconnect the space with the main living room when the sliding doors are open. Obviously a socket 230 V is not missing in the bedroom.

From model year 2016, the bedroom has not only the door leading to the rear deck, but also opening aluminum window in anthracite color.

## **6. Bathroom**

The bathroom has a shower including screens and shower set Hansgrohe.

Due to the character of No1 Living, bathroom contains ceramic toilet with electric pump flushing. Clean and sleek bathroom design underlines a separate sink Villeroy Boch with cabinet and Hansgrohe sink faucet. The mirror is positioned on the upper hanging cabinet. Even in the bathroom the 230 V socket and LED spotlight is not missing. On the insulated floor is set highly durable, washable flooring. The bathroom has as standard a tilting window for direct ventilation with aluminum frame in anthracite color and tempered double glazing with glass in non-transparent adjustment.

## **7. Technical (maintenance) room**

As in every apartment or house, even in the No1 Living is not missing the technical room, which is a technological center for safe running. Switchboard, including protection against overvoltage and indicator of drinking and waste water is fulfilled with separate lighting.

## **8. Storage room**

This space is accessible from the outside by separated doors. Expansion tank for pressure water distribution and drinking water pump with hot water boiler is placed there. It contains also a separated lighting fixture.

## **9. Lower deck 20m<sup>2</sup>**

The characteristic label of No1 Living is a comfortable and safe walkway around the entire vessel with the walkable rear and front deck together with a high steel railing with handrail made from beautiful fine wood Iroko filled with stranded wires made of stainless steel. Railing of walkway is equipped with four going through passes. The deck is made from natural pine wood. On the lower deck is also positioned a filling tube for drinking water together with suction opening for the waste tank.

There are 4 anchoring cleats of No1 Living on board, and they are located in every corner. On the rear deck is also located connecting point for the ground connection 230 V.

In each of the four corners of the ceiling is placed LED spot light for safe movement on deck at night. There is also a 230 V socket in the ceiling on the rear deck.

## **10. Upper terrace 50m<sup>2</sup>**

What distinguishes No1 Living from apartments, houses and boats of similar size is surprisingly a large walkable upper terrace. Entrance to mentioned upper terrace is through comfortable stairs from the rear deck, so even during bigger visits is kept privacy of owners in the bedrooms. Steel staircase with fine wood Iroko is equipped with stainless steel railing. The whole terrace is equipped with steel railing with stainless steel wires and robust handle from fine wood Iroko for maximum security. Upper terrace is provided with a flexible waterproofing coating for long durability and drained by four built-in water drain pipes.
